CORY, MAJOR ROBERT Y. MARCH-1919 (017)

I would say she is thoroughly competent, speaks five or six languages as well as she does English, and created rather a sensation at Leiden University, where she took the Gold Medal in her subjects

I would be very glad if you would let me know whom she should get in touch with,

Yours very sincerely

Robert Glow

Major

15th Bn

5 Deer Park Crescent
Toronto

March 6

Dear Sir Robert,

I enclose a letter just received from a young lady I met while I was an interned Prisoner in Holland, and would be glad if you could find time to advise me how to answer it.

March 10th, 1919

Major R. Y. Cory,
5 Deer Park Crescent,
Toronto.

My dear Major Cory:

I am glad to get a letter from you again in Toronto and I hope that when you have time you will come in to my office to see me. Unfortunately I have been kept in the house for a week with a bad cold, and I do not expect to be in my office again until the middle of the week. This has also delayed my answering your letter. I am afraid, however, that I do not know anything in which I could be of any help to Miss Van C.S. Van Delden. There is no vacancy on our staff so far as I am aware for which she could apply. As it is there is always an increasing number of our own graduates coming forward and they are usually prepared for the position by the Professor who has been training them. It is possible, however, that she might get some position in one of the ladies' colleges in Toronto though I know very little about their needs. Certainly I would advise her against running the risk of giving up a good position in Holland and coming out here in the autumn unless she has something very definite in view. As far as I can see in the University we shall have rather more difficulty in fitting members of our former staff into their positions than

in securing new persons to fill the positions.

I hope that you have had word from your brother, the General, that he has reached safely his destination. With kind regards, I am,

Yours sincerely,

President.
